

To Whom it May Concern,

Here is my input to the Genteknologiloven:

I support the suggestion for "nivå-delning", in the form that 18 of the 20 Biotechnology Council members propose.

I think that ALL genetic modification should be reported and labelled (whether as a research or consumer product).

And I support that a positive societal benefit needs to be shown for all GM organisms.

Thank you for the opportunity to comment on this issue.

Sincerely,  
Dr. Dorothy Dankel
